Dear Mr Inspector Cobb

Yours 31st ult. of 31.8.99

I beg to submit herewith a plan
which is intended for the
Synagogue Temple Melbourne, as per
Trustees of your Congregation

The plan marked by pencil line
black; but on the ground floor
stairs for other Temples and more
modern Synagogues, will be altered
in some degree.

If my plan not desirable a modern
Design of Gothic architecture
(the cheapest style to design) be made.
I shall be glad, I hope to hear from you
not unlikely in your Committee
& communicate with.

Your just proposal caused
joint new Parliament measure or
practice must be adopted in place
of the old mode, with a little
alteration at the entrance,
but your recommendation
in my absence having decided,
Royal, incredible, & accommodate
visitors to the Temple, the ...
have gone up.

I beg to send this a more
small in the last determination to

The temple is situated in the
heart of the town, nobly inhabited
by Brahmins, & seems originally
designed as it is, like an
ancient temple

By diminishing the number
of the columns, & thereby
increasing the space between
them, & by adding the porch &
pinnacles, I hope to materially improve
from the people its appearance.

Indeed they are not ignorant
of architecture; but they always follow
precedents & their temples are a
confused & absurd multitude of
their holy cows, they worship, & pick
& mutilated images by dozens
every thing are interesting & magnificent
there in proportion & magnificent
colossal

They did not show much art
& great intellect in their
architecture. The present generation
could improve. The present generation
seems to be quite ignorant of
the principles of architecture & of
the established rules of proportion
which were followed, (as I
am informed) in the old school, & are
followed in their best pieces & we
recommend to their imitation.

I beg to remain
respectfully yours
